

DUSTMAG

Service Road Dust Control

6gef Ua` fda^Xad g` bShW æervice daSve

MeltSnow.com is focused on snow, ice and dust control products and services that create value for the customer by utilizing our extensive product and technology knowledge and experience. We work together with the client to bring economical dust solutions to permanent and temporary unpaved roadways.

The magnesium chloride products provided by MeltSnow.com strive to be the ideal solution for dust control based on our expertise in effective, economical products which have a proven track record and meet or exceed the standards set forth by US regulatory agencies for minimal environmental impact.

DustMag allows the development of tailored solutions and the ability to produce continuous improvements over time, which is returned in economical benefits of savings both direct and indirect to the customer. Fugitive dust is high on the list of targets of most regulatory agencies, and the benefit of both stabilizing the road while removing the need of constantly watering is easy to quantify.

I ZSf [eDustMag?

DustMag is the brand name for our product and technology based on the use and application protocols of bischofite specifically developed for unpaved roads. The technology ensures the best results in the stabilization of dust generated by the passage of vehicles on the unpaved road, by eliminating the use of customer resources involved: water, personnel, and equipment. It further improves the durability of the road by deep stabilization which reduces loss of the fines which are necessary to hold the larger aggregates in place for a strong roadbase.

The result of using DustMag are quantifiable improvements to the environment and in safety and vehicle maintenance.

DustMag S` V fZW7` h[da` _ Wf

- **DustMag** is 100% natural, colorless and odorless.
- **Si gA U** is non-polluting and is 2.5 times less toxic than table salt.

BeneffeaXge[Y DustMag

- **Cost Savings:** reduces the loss of granular material and the costs of road maintenance and operation of vehicles.
