

PURE & NATURAL DEICER™

A blended deicer containing sodium chloride, calcium chloride, and magnesium chloride.

Shown on Snow

Without Indicator

With *EnviroIndicator*

- Contains Sodium Chloride, Calcium Chloride, and Magnesium Chloride
- Performance blend melts snow and ice down to -6° F
- ***EnviroIndicator***: A very small amount (0.00025%) of a biodegradable non-ultraviolet stable organic dye is added so that when applying to white snow and ice users can easily identify treated areas.
- ***EnviroIndicator*** prevents over-application which helps the Environment
- 50 lb. heat sealed plastic bags packed 50/pallet
- 48x40 4 way entry pallets stretched wrapped with bottom slip sheet
- Uniform particle size to facilitate easy flow in most spreaders
- Proven commercial/professional formula

PURE & NATURAL DEICER is a completely natural deicing product that is mined in the Northern Chilean desert, then carefully screened to uniform particle size and packaged. In its natural state, it is a white crystalline granule. Containing all the freeze point lowering chlorides that make it ideal for deicing applications.
